

Curriculum Vitae – Anton Kuttyrev

General information

ORCID: 0000-0001-5933-6455

Education

2020 PhD in Geology and Mineral Sciences, defended 2019, awarded via the Dissertation Council at the V.S. Sobolev Institute of Geology and Mineralogy (SB RAS), 2020; research conducted at the Institute of Volcanology and Seismology (RAS), Petropavlovsk-Kamchatsky.

2017 Saint Petersburg Mining University, Russia. Specialist degree with Distinction in Applied Geology (5-year full-time program, broadly equivalent to a Master of Science).

Academic appointments

Current Lecturer in Exploration Geology, Cardiff University Kazakhstan, Astana, Kazakhstan. Research and teaching in economic and exploration geology, including layered intrusions, chromitites, platinum-group elements, critical minerals, and isotope geochemistry. Current duties combine teaching and curriculum development in the geology programme with research in economic and exploration geology. This includes delivering Year 1 teaching, developing a new field course for the Kazakhstan programme, and building field-based learning into the curriculum. I teach World of Dynamic Environments (EA3504), a Year 1 module that uses geological and environmental case studies to introduce students to dynamic Earth systems. This year, I will also teach Earth Materials and fieldwork.

2025–2026 Postdoctoral Research Fellow, School of Geosciences, University of the Witwatersrand, Johannesburg, South Africa. Research on critical minerals in layered mafic-ultramafic intrusions and Bushveld chromitites within the DSTI CIMERA industry–public consortium, with a focus on Ni-Cu-PGE systems, chromitites, and the petrogenesis of the Critical Zone.

2023–2025 Research Associate, School of Earth and Environmental Sciences, Cardiff University, Wales, UK. Critical-minerals and PGE geochemistry in layered intrusions and related volcanic rocks, as part of the Horizon Europe SEMACRET consortium on energy-transition mineral systems, in an interdisciplinary team spanning geology, geophysics, and social sciences.

2022–2023 Fulbright Visiting Scholar, School of Earth Sciences, University of Oregon, USA. Investigation of Early Archean climate using triple oxygen and hydrogen isotopes in metalavas from the 3.8 Ga Saglek-Hebron terrane, including development of isotope fractionation models.

2020–2022 Research Associate, Institute of Volcanology and Seismology, Petropavlovsk-Kamchatsky, Russia. Research on PGE mineralization and hydrothermal processes in subduction-related magmatic systems in Kamchatka.

2017–2020 PhD candidate, Institute of Volcanology and Seismology, Petropavlovsk-Kamchatsky, Russia. Doctoral research on geology and platinum mineralization of concentrically zoned dunite-clinopyroxenite-gabbro complexes of the Tamanvayam and Epilchik groups.

2012–2017 Engineer (0.5 FTE), Karpinsky Russian Geological Institute, Saint-Petersburg, Russia. Work on regional geology and petrology, including petrography and geochemical data for igneous and metamorphic rocks.

Industry appointments

2018 Geologist (summer fieldwork), Kirganik Ltd. (Amur Minerals subsidiary), Kamchatka, Russia. Exploration for porphyry Cu and epithermal Au systems, including field mapping, alteration and mineralization logging, and geochemical sampling.

2016–2017 Geologist (summer fieldworks), Kamp Ltd., Kamchatka, Russia. Junior exploration for PGE mineralization, including prospecting, field mapping, heavy-mineral sampling, rock and soil geochemical sampling.

2015 Field technician (summer fieldwork), Kamchatgeologia, Kamchatka, Russia. Regional geological mapping at 1:200 000 scale, including traverses, outcrop description, and systematic sampling for petrography and geochemistry.

Research focus

Petrology and mineralogy of mafic-ultramafic and island-arc systems; melt-rock and fluid-rock interaction; origin of chromitites; PGE mineralogy from hand-sample to nanoscale, including alloys and PGE oxides; PGE/PGM cycling and mobility in melts and fluids in ultramafic rocks and layered intrusions; oxygen isotopes as tracers of crustal recycling and early Earth surface environments; critical minerals in the context of the energy transition.

Teaching experience

Current teaching: Cardiff University Kazakhstan. Lecturer for World of Dynamic Environments (EA3504), a Year 1 module on dynamic Earth systems, taught through geological and environmental case studies. This year, I will also teach Earth Materials and fieldwork.

Current development: New field course development. Designing and building a new field course from scratch for the Kazakhstan programme, including its academic structure, field activities, and teaching materials.

University of the Witwatersrand: 5-lecture module on magmatic mineral deposits for honours students, demonstrator for the honours field trip (Northern Bushveld)

Cardiff University: practical sessions for the mineral deposits course; guest lectures on mineral deposits; demonstrator for field courses in areas of geological mapping, exploration geology and environmental geoscience (courses in Cyprus, Cornwall, and South Wales)

University of Oregon: demonstrator for petrology field courses; guest lectures in petrology and geohazards

Formal teaching training

Teaching to Improve the Quality of Student Learning, Cardiff University, 2024

Lecturing Skills, Cardiff University, 2024

Being a Good LGBTQ+ Ally, Cardiff University, 2024

Student supervision

2026–present Co-supervisor (together with prof. Roger Gibson) of the project “Calc-silicate xenoliths in the lower zone of the Bushveld Complex and their implications for platinum-group element mineralization” (student Mensacia Phaswane)

Additional professional training

PetThermoTools virtual workshop, 2026

Reading the rocks, Polokwane, South Africa, 2025

Resource Geology Workshop at the 2025 GeoCongress, Bloemfontein, South Africa

MDSG workshop “Magmatic Ni-Cu Mineral Systems in Europe”, Edinburgh, 2024

TESCAN electron microscopy course, Saint-Petersburg, 2021

Gold Short Course, Prague, 2018

Analytical and modelling skills

Hands-on: SEM-EDS, Raman spectroscopy, field portable XRF, clean-lab chemistry and mass spectrometry for Rb-Sr, Sm-Nd, triple-oxygen isotopes (laser fluorination line), LA-ICP-MS.

Data reduction and interpretation: EBSD, X-ray diffraction, synchrotron micro-XRF/XAS, FIB-TEM, EPMA, atom-probe tomography.

Modelling and data processing: Python and spreadsheet-based workflows, MELTS- and MAGEMin-based thermodynamic modelling, Monte Carlo modelling of triple-oxygen isotope exchange, mass-balance and mixing models.

Scientific service

Minerals and Energy Research Centre, Cardiff University – coordinator (2024–2025)

2023 International Platinum Symposium, Cardiff, UK – member of organizing committee

Reviewer for: 'Ore Geology Reviews'; 'Mineralium Deposita'; 'Nature Communications'; 'Chemical Geology'; 'Journal of Petrology'; 'Australian Journal of Earth Sciences'; 'Contributions to Mineralogy and Petrology'; 'Journal of the Geological Society'; 'Lithos'; 'Marine Geology'.

Competitively awarded funding (converted from foreign currencies, approx. EUR)

2024 In-kind analytical access through AuScope Access Program (Curtin University): "Silicate–oxide–platinum group minerals intergrowths: implications for unknown aspects of low-T PGE behaviour" - approx. EUR 10,700

2022–2023 Fulbright Scholarship: Fulbright Visiting Scholar - approx. EUR 26,600

2020–2022 RFBR Project No. 20-35-70008 (project executor): "Formation and alteration of minerals in active volcanic hydrothermal systems (Kamchatka)" - approx. EUR 114,000

2020–2021 RFBR Project No. 20-05-00290 (principal investigator): "Distribution of Ni-Fe-Co intermetallic compounds and platinum-group minerals in mafic and ultramafic rocks of various formational types" - approx. EUR 21,500

2018–2020 RSCI Project No. 16-17-10145 (project executor): "Melt-fluid evolution, magmatic immiscibility, and metal budgeting in subduction-related magmas" - approx. EUR 171,000

2018–2019 RFBR Project No. 18-35-00126 (principal investigator): "Typomorphism and formation conditions of PGE minerals in concentrically zoned ultramafic massifs (Epilchik area, Koryak-Kamchatka belt)" - approx. EUR 9,700

Total research funding received: approx. EUR 353,600

Field work

2025–ongoing Mapping and sampling of the Critical Zone across western and eastern Bushveld Complex, South Africa (one month fieldwork + regular mine visits)

2023–2025 Fieldwork at the Rhiw layered intrusion, Wales, UK (8 days in total)

2021 Principal investigator and organizer of a helicopter-supported expedition (12 participants) to Tumrok Range arc picrites, Kamchatka (three weeks)

2020 Sampling of alluvial awaruite in Kamchatsky Mys ophiolite, Kamchatka (two weeks)

2020 Documenting cooling of lava flows and caves of 2012–13 Tolbachik Fissure Eruption (two weeks); observations of Klyuchevskoy volcano

2019 Underground and field sampling of mineralized intrusions and related flood basalts, Norilsk (two weeks)

2018 Documenting temperatures of lava in the caves of 2012–13 Tolbachik Fissure Eruption (two weeks); visual observations of Shiveluch volcano

2018 Fieldwork on Kamchatsky Mys ophiolite (two weeks)

2018 prospective works on Kirganik Cu porphyry and epithermal Au occurrence (one month)

2016–2017 Prospecting for lode and placer PGE mineralization, Epilchik and Matysken areas, Koryak Highlands (5 months in total)

2015 Geological mapping 1:200 000 scale, Koryak Highlands (3 months)

Professional societies

Society of Geology Applied to Mineral Deposits (SGA), 2017–present

Awards

2023 Minerals Young Investigator Award

2021 Marie Skłodowska-Curie Actions Seal of Excellence

Public outreach

Experience of school visits in the UK and Russia covering ages 8 to 16: multiple interactive lectures about volcanoes, minerals, rocks, societal impact of geology, and career perspectives of a geoscientist.

Code for 1- and 2-stage oxygen fractionation and metamorphic dehydration modeling from "Seawater-oceanic crust interaction constrained by triple oxygen and hydrogen isotopes in rocks from the Saglek-Hebron complex, NE Canada", zenodo.org. <https://doi.org/10.5281/zenodo.12795578>.

Conference talks:

42. IMSG-2026, Barberton, South Africa, oral presentation "Mottled anorthosites and discordant ultramafic pipes in the MG4-UG1 interval of the Upper Critical Zone, Bushveld Complex".
43. Geocongress-2025, Bloemfontein, South Africa, oral presentation "Petrogenesis of the Akanvaara layered intrusion".
44. MDSG-2024, Edinburgh, poster "Assessing mass-balance of layered intrusions: the Akanvaara intrusion case study in Lapland, Finland".
45. Goldschmidt 2023, Lyon, France, remote oral talk "Early Earth's hydrosphere: insights from the hydrothermally altered submarine lavas of the Eoarchean Saglek-Hebron Complex, Canada", 2023.
46. 14th International Platinum Symposium, Cardiff, UK, in-person oral presentation "Origin of native osmium in metamorphosed peridotites: insights from multiphase inclusions (Adamsfield placer, Tasmania)", 2023.
47. Virtual Early Career Platinum Symposium 2022, online conference, oral presentation "Noble metals in arc basaltic magmas worldwide: a case study of modern and pre- historic lavas of the Tolbachik volcano, Kamchatka".
48. EGU General Assembly 2021, online conference, oral presentation "Awaruite (Ni_3Fe) as a platinum-group elements concentrator: Preliminary data".
49. SGA 2019 Conference, Glasgow, United Kingdom, oral in-person presentation "Platinum mineralization in Ural-Alaskan complexes of Koryak Highlands (far east Russia)".
